Summary:
Highly motivated and enthusiastic individual with a strong background in front-end development and a desire to expand skills in Java programming. Seeking a position as a Junior Software Developer to leverage my internship experience in front-end technologies and passion for learning new technologies in order to contribute to a dynamic and collaborative development team.

Education:
Bachelor of commerce
SRM University.

Skills:
- **Front-End Technologies:** HTML, CSS, JavaScript.
- **Object-Oriented Programming:** Python (personal experience).
- **Source Code Version Control:** Git, GitHub.
- **Database Technologies:** PostgreSQL, MongoDB (NoSQL).
- **Cloud Computing:** Familiarity with Google Cloud and Heroku.
- **Frameworks:** Django, Bootstrap.

Experience:

Web Dev Intern- Klenty (sales engagement software)
- - Collaborated with the development team to assist in building and maintaining websites using HTML, CSS, and JavaScript.
- - Worked closely with UX/UI designers to ensure seamless integration of designs and development.
- - Assisted in testing and debugging web applications to ensure optimal performance and user experience.
- - Participated in code reviews and version control using Git to ensure code quality and collaboration.

Projects:
- Developed **responsive landing pages** as part of the internship program.
- Developed a dynamic e-commerce project using DJANGO framework(PYTHON+POSTGRESQL).
- Created a responsive facebook homepage ui clone using HTML CSS BOOTSTRAP.
- An Assignment project I had received from Klenty pvt ltd. It is Multi-device Responsive Website.
